<b>Preface</b>	<b>x</b>
<b>Foreword by Jean-Pierre Bienaimé</b>	<b>xii</b>
<b>Foreword by Tom Wheeler</b>	<b>xiii</b>
<b>Acknowledgements</b>	<b>xv</b>
<b>1 Introduction</b>	<b>1</b>
1.1 The 3G Mobile Pathfinders: Existing Wireless Communication Systems	1
1.1.1 Analogue Cellular	2
1.1.2 Cordless Systems	2
1.1.3 Professional Mobile Radio	4
1.1.4 Terrestrial Trunked Radio (TETRA)	4
1.1.5 Short Range Radio	5
1.1.6 Mobile Satellite Systems	6
1.1.7 International Maritime Satellite Organization: Inmarsat	6
1.1.8 IRIDIUM and Globalstar	7
1.1.9 Paging Systems	8
1.1.10 In-Flight Telephone	10
1.2 The History of 3G	12
<b>2 Mobile Communications Markets</b>	<b>21</b>
2.1 Market Analysis	21
2.1.1 Market Expectations and Forecasts at the Time of Licensing the First 3G/UMTS Networks (c. 1999)	21
2.1.2 Customers' Expectations	22
2.1.3 The Technology Background	23
2.1.4 Market Dynamics	23
2.1.5 General Principles for Preparing a Market Study	26
2.1.6 Study Methodology	27
2.2 The Market Studies of the UMTS Forum	28
2.2.1 Short Summary of the Study	30
2.2.2 Study Framework	32
2.3 Calculations	38
2.3.1 Business Models for 3G Services	38
2.3.2 User Profits and Needs by Service	43
2.3.3 Price Trends	44

2.3.4	3G Market Demand Forecasts	49
2.3.5	Worldwide and Regional Revenue Forecast by Service Categories	59
2.3.6	Regional Forecasts for Selected Services: 2000–2010	62
2.4	Expectations	68
2.4.1	Business Implications	68
2.4.2	Chances for 3G	77
2.4.3	Barriers for 3G	80
<b>3</b>	<b>Services and Applications</b>	<b>83</b>
3.1	Introduction	83
3.1.1	The 3G Business Chain	83
3.1.2	The Move to Multi-Service Market Opportunities	84
3.1.3	Quality of Service	86
3.2	Description of Some Services and Applications	87
3.2.1	Entertainment	88
3.2.2	Mobile Shopping	92
3.2.3	Experts on Call	93
3.2.4	Remote Monitoring	96
3.2.5	Telematics/Telemetry/Monitoring	97
3.2.6	Advantages for Mobile Workers	99
3.3	Portals and their Business Models	99
3.3.1	Defining a Portal	100
3.3.2	Key Success Factors	102
3.3.3	Portal and Content	102
3.3.4	The Important Role of Video in the Context of Portals	103
3.3.5	Positioning of Network Operators within the Portal Industry	103
3.3.6	The Role of an Internet Service Provider	104
3.3.7	The Role of the Content Provider	104
3.3.8	Requirements for Portal Set-Up	104
3.4	Service Providers' Business Strategies	110
3.4.1	The Billing Challenges and Opportunities	112
3.4.2	Privacy, Data Protection and Legal Interception	115
3.4.3	Harmful and Illegal Content and Protection of Minors and Public Order	116
3.5	Mobile Internet Protocol	117
3.6	IP Multimedia Subsystem: Service Aspects	118
3.6.1	Definition	118
3.6.2	The IMS Vision	119
3.6.3	Internetwork Interoperability	120
3.6.4	Voice Over IP	121
3.6.5	IMS in Summary and Conclusion	124
3.7	Naming, Addressing and Other Identifiers	125
3.7.1	Naming	125
3.7.2	Addressing	133
3.7.3	Other Identifiers	136
3.7.4	Benefits and Drawbacks of a Mobile Top-Level Domain	139
<b>4</b>	<b>Technology</b>	<b>143</b>
4.1	The ITU IMT-2000 Family Concept	143
4.2	Technology Competitors	146

4.3	Impact on Standardisation	148
4.3.1	Mobile Multimedia Portal Platform	149
4.3.2	Mobility	150
4.3.3	Security	152
4.3.4	Further Aspects	155
4.4	Terminals and Devices	156
4.5	Names and Addresses Used in GPRS	157
4.5.1	Access	157
4.5.2	Domain Names	160
4.5.3	Access Point Name	163
4.5.4	IP Addresses and their Allocation	165
4.6	IMS	170
4.6.1	Technology Aspects	170
4.6.2	Separation of Control and Bearer Planes	171
4.6.3	IP Multimedia Call Control	171
4.6.4	IMS: Quality of Services	173
4.6.5	UMTS Baseline Network Architecture	175
4.7	WLAN/Wi-Fi	179
<b>5</b>	<b>Spectrum for UMTS</b>	<b>183</b>
5.1	Spectrum Availability	185
5.1.1	WARC-92 Initial Allocation	185
5.1.2	European Spectrum for UMTS	186
5.1.3	UMTS Spectrum in Other Areas of the World	187
5.2	WARC-92 Spectrum Sharing Scenarios	189
5.2.1	First Traffic Characteristic Calculations of the UMTS Forum	191
5.2.2	Spectrum Efficiency and Spectrum Sharing	193
5.2.3	Symmetric and Asymmetric Spectrum Use	195
5.2.4	Service Classes and Switching Modes	196
5.2.5	UMTS Market Assumptions	198
5.2.6	Traffic Capacity Requirements in Urban Environments	198
5.2.7	Minimum Spectrum per Operator from a Technical Point of View	200
5.2.8	Spectrum Allocation and Deployment Scenarios	201
5.2.9	Possible Scenarios	203
5.3	More Spectrum Needed: Extension Bands for UMTS/IMT-2000 and WRC-2000 Results	207
5.3.1	Worldwide Mobile Multimedia Market	209
5.3.2	Total Spectrum Estimates	209
5.3.3	Basic Principles Influencing the Choice of Frequency Bands	211
5.3.4	A Flexible Approach to Additional IMT-2000 Spectrum	211
5.3.5	The UMTS Forum Analysis of Each Candidate Extension Band for UMTS/IMT-2000	212
5.3.6	Decisions Made at WRC-2000	216
5.3.7	Consequences for the Future of IMT-2000	217
5.4	The Situation After WRC-2000	217
5.4.1	How to Use the New Spectrum 2.520–2.670 MHz	217
5.4.2	3G Offered Traffic Asymmetry	220
5.4.3	Measured Actual GPRS and WLAN Traffic Asymmetry	223

5.4.4	Summary and Recommendation of Second Traffic Calculation of the UMTS Forum	225
5.4.5	Future Activities	227
5.5	Spectrum Beyond 3G and Preparation for WRC-07	227
<b>6</b>	<b>Regulation, Licensing and Global Terminal Usage</b>	<b>229</b>
6.1	Regulation	229
6.1.1	Historical Background	229
6.1.2	Regulation Consequences and Political Implications	231
6.1.3	Spectrum Ownership	232
6.2	Licensing	233
6.2.1	Which Rights are Transferred in a Spectrum Licence?	233
6.2.2	The Impact of Licence Costs	234
6.2.3	Licence Fees	235
6.2.4	The Value of Spectrum when Reused	238
6.2.5	Use of Spectrum Pricing as an Incentive for Efficient Use	238
6.2.6	Use of Spectrum Pricing as an Instrument of Selection	239
6.2.7	Use of Spectrum Pricing as an Instrument of Taxation	241
6.2.8	Impacts on Society	241
6.2.9	Consequences for the Industry	242
6.2.10	Aspects Concerning Licence Conditions	242
6.2.11	Regional Licences	247
6.3	Recommendations for Administrations	247
6.3.1	Nature of Licence	248
6.3.2	Selection of Licensees	248
6.3.3	Spectrum Pricing	248
6.3.4	Rollout Obligations	248
6.3.5	Roaming Agreements	249
6.3.6	Facility and Infrastructure Sharing	249
6.3.7	Re-licensing of Returned Spectrum	249
6.3.8	Fixed and Mobile Services and Networks	249
6.3.9	UMTS Satellite Component	249
6.4	Lessons Learned from the Licensing Process	250
6.5	Global Terminal Circulation and Certification	253
6.5.1	Conclusion	257
<b>7</b>	<b>Mobile Communication and its Impact on Social Behaviour</b>	<b>259</b>
7.1	Executive Summary	259
7.2	Theme 1: Social Connectivity	261
7.2.1	Findings	261
7.2.2	Integration with Other Data	262
7.2.3	Implications for UMTS Suppliers	263
7.2.4	Interviews with Experts: Revisions of the Implications	263
7.3	Theme 2: Emotion and Mobiles	265
7.3.1	Findings	265
7.3.2	Integration with Other Data	266
7.3.3	Implications for UMTS Suppliers	266
7.3.4	Interviews with Experts: Revisions of the Implications	268
7.4	Theme 3: Public and Private	269

**CONTENTS****ix**

---

7.4.1 Location Based Services	269
7.4.2 Imaging and Mobile Phones	273
7.5 How GSM was Shaped by the Consumer	276
7.5.1 Introduction	276
7.5.2 Evidence of Social Shaping – Benchmarking the Present	277
7.5.3 Further Evidence of Social Shaping	279
<b>8 3G and Beyond</b>	<b>283</b>
8.1 A Long-Term Business Issue	283
8.2 The Research and Development Path	285
8.3 Research Programmes	287
8.3.1 Asia	287
8.3.2 USA	287
8.3.3 Europe	287
8.4 Impact on New Spectrum and WRC-2007	287
8.5 Implications for System Design	291
